This feedback relates to Store 6339, at 1210 W 21st St., Clovis, NM. The date of transaction 19990 was 09-26-25 at 2:33pm. The receipt says the cashier was Viridian. I had formerly praised this store's new cash registers, which provided a receipt in a way whereby the customer could get it; but a scammer cashier would have a hard time depriving the customer of it.

Well: Viridian figured out a way. First, she simply didn't provide the receipt. She burdened me to have to make issue of getting it. Then, she hit something on the register, but it spit out several papers on HER; not my, end. She grabbed 1 and gave it to me. She rationalized at the time, that most customers don't want their receipts.

Apparently, she had access to mess with the register, to get it to bypass the formerly automated spitting out of a receipt on the customer's side of the register, as it always should.
